EXPERIENCE

Junior Software Developer

Aug 2025 to Present

Vaken Technology | Product: Sovablu

Trichy, India

- Engineered scalable REST microservices and APIs with **Java 21**, **Spring Boot**, and **PostgreSQL** for the Sovablu enterprise platform, implementing rate limiting and Singleton design pattern for high availability.
- Optimized database query performance through **query tuning**, **connection pooling**, and **Redis caching** at critical hotspots, substantially reducing DB response latency.
- Engineered features for **Galaxy One**, an **Agentic AI workflow system**, leveraging **Claude SDK model switching** and **AWS Bedrock** to accelerate software development workflows and reduce engineering overhead.
- Maintained automated **Jenkins CI/CD** pipelines (JAR build, automated testing, and deployments) across **AWS EC2, S3, and Lambda** for cloud infrastructure.
- Developed frontend features in **Vue.js** and configured CORS and proxy for secure client server communication.

PROJECTS

KadalVazhi: Autonomous Maritime Intelligence Platform

2026

Java, Spring Boot, Python, LangGraph, Kafka, PostgreSQL, DynamoDB, gRPC

Production Microservices

- Architected distributed maritime engine with **Java** and **Spring Boot** for core backend security and **Python** for **LangGraph multi agent orchestration** and **Claude SDK model routing**.
- Engineered microservices communication layer utilizing **Spring Boot**, **REST APIs**, **GraphQL**, and **gRPC** for high throughput vessel telemetry, direct fish trade, and automated **emergency mechanic dispatch agents** for at sea boat repairs.
- Implemented **dual database architecture with PostgreSQL and DynamoDB**, backed by **Apache Kafka** event streaming to scale concurrent vessel telemetry and power dynamic **fisherman and boat crew job matchmaking**.
- Designed resilient **offline first synchronization engine**: logs vessel telemetry in local SQLite at sea and auto syncs to cloud PostgreSQL upon cellular reconnection, with a 3 attempt fallback loop for weather safety.
- Built comprehensive fish catch analytics engine aggregating historical catch data for data driven voyage decisions, supporting multilingual accessibility across **Tamil, English, and Malayalam via i18n**.

TECHNICAL SKILLS

Languages: Java (Core & 21), Python, SQL, C++, JavaScript

Backend & APIs: Spring Boot, FastAPI, REST APIs, GraphQL, gRPC, Microservices

Distributed Systems & Cloud: Apache Kafka, Distributed Systems, Redis Caching, Rate Limiting, Docker, Jenkins CI/CD, AWS (EC2, S3, Lambda, Bedrock)

Databases: PostgreSQL, DynamoDB, MySQL, Redis, SQLite

AI & Systems: LangGraph, Agentic AI, Multi Agent Orchestration, Claude SDK, LangSmith, i18n

ACHIEVEMENTS

LeetCode Knight Badge

Global Rank #114 / 43,000+

Contest Rating 1,994 (Top 2.73% Global)

LeetCode

- Earned the **LeetCode Knight badge** (Top 2.73% worldwide) with an official **Contest Rating of 1,994**; achieved multiple 4/4 perfect solves with a peak **Global Rank #114** in Weekly Contest 517 and **Rank #197** in Contest 490.
- Solved **700+ algorithmic problems**: 446 in **Java** (Graphs, Trees, DP, BFS/DFS, Linked Lists), 443 in **Python3**, 40 in **MySQL/SQL**, and 31 in **C++**.

EDUCATION

Knowledge Institute of Technology

Salem, India

B.Tech in Artificial Intelligence and Data Science | CGPA: 8.1

2021 to 2025

CERTIFICATIONS

Core Java & SQL (EBox) | MySQL Database (IBM) | Machine Learning (Simplilearn) | Deep Learning PyTorch (Guvi)
